

**Bingli** is a digital health start-up, located in Antwerp. Bingli recently received €5.4 million funding and won already several awards: Best start-up in Belgium (2018), participant Technology Fast 50 & Winner Rising Star Award Deloitte (2021),... Based on Artificial Intelligence, a **digital medical interview** is conducted with the patient, prior to their medical consultation. Bingli then proposes a highly accurate differential diagnosis to the physician to support the clinical decision-making. This innovative application contributes to a more qualitative and efficient consultation, brings back more empathy during the consultation and creates more comfort for the patient. Bingli works together with doctors, hospitals as well as pharmaceutical companies. Today, the medical interview has already been used by more than 750 000 patients.

Bingli is rapidly expanding and has big ambitions. To support this growth, we're looking for a (m/f/x):

## Senior Frontend Developer

### Job Description

- As member of the technical team of Bingli, you will be responsible for the patient and doctor facing experience of Bingli.
- You design, implement and manage, in close collaboration with the other developers and business owners, the UX/UI aspects of the application.
- You have a profound knowledge of frontend technologies (notably Angular).
- You work pro-actively and have a problem-solving mindset in order to build a more efficient workflow.
- Master new and diverse web technologies and techniques. You are interested in and willing to learn new cutting-edge technologies.
- You're able to produce clean, high-quality code.
- You have good time-management and self-organizational skills and can juggle multiple tasks within the constraints of timelines and budgets.
- You are able to guide and coach junior developers.

### Profile

- You have at least **5 years of experience** as a frontend developer.
- You have a solid understanding of how web applications work including security, session management, and best-development practices.
- You have a strong knowledge of Object Oriented Programming.
- Technical skills:
  - o Angular components, SASS
  - o Experience building responsive web apps
  - o Experience with NgRX and RxJS
  - o Root cause analysis of field issues, and definition of corrective actions.
  - o Interest in CI/CD – DevOps, by preference Azure Devops;
  - o Experience in GIT
  - o Experience with NgRX and RxJS

- Ability to work and thrive in a fast-paced environment and learn rapidly.
- You have strong communication and problem-solving skills.
- You're a team player, eager to learn and like a challenge.
  
- Ideally, you live in the Antwerp area or can easily move to the office, as you'll be working several days physically from the office in Antwerp.
- You are fluent in English. French or Dutch is a plus.

## Offer

- A challenging position in a rapidly growing environment, that provides you with numerous opportunities to learn new things and to take on new challenges and responsibilities.
- Contribute to the growth of a start-up and the healthcare of the future.
- Competitive salary with home-working policy.
- A dynamic and young team with lots of fun and regular team events!
